RNTS

Support for Church Congregations

Managed Service

Looking for technical support for your congregation? RNTS offer a fully supported managed service platform for churches which includes lots of great benefits:

- An annual health check of your systems.

- Emergency callout for loss of service.

- Reduced callout charges for equipment faults and repairs.

- Ongoing remote support and assistance, as well as helpdesk functionality and regular updates via our remote tools.

- Discounted rates on our hire equipment (microphones, cables, speakers, lights) and production services.

Digital Services

We setup and support email services with custom domain names with technology backed by Google or Microsoft.

We have our own managed website platform where we can design and manage webpages with advanced analytics.

RNTS

Installation

Our installation department is very experienced in church installation. Services we provide include:

- Sound system design, installation alteration and repair. Speakers, wired & radio microphones and induction loops.

- Distributed video systems, displays, projectors and video equipment.

- Livestreaming equipment, including cameras and vision mixers to allow services to be broadcast online.

- Managed networks, including building wide Wi-Fi coverage, IT installations and remote support.

- Other services we offer include Design Consultancy, Domain Services and Electrical Testing.
